**– Introduction**

The Bachelor of Computer Applications (BCA) program at St. Aloysius (Deemed to be University) prepares students for a thriving career in the rapidly evolving field of computer applications. The curriculum begins with the Fundamentals of Computers, providing a solid foundation in computer systems, hardware, and software, which is essential for all subsequent learning. As students progress, they delve into Programming in C, a critical skill for any aspiring programmer. This subject emphasizes the principles of programming, enabling students to develop efficient algorithms and write robust code. Complementing this, the Mathematical Foundation course equips students with essential mathematical concepts that underpin computer science, including logic, set theory, and combinatorics.
