AS PART OF YOUR COURSE, YOU'LL :

- Study data governance, considering how data can be sourced, consolidated and stored securely, responsibly and efficiently
- Explore techniques used to analyse data
- Discover how data can contribute to a company's business strategy
- Focus on the application of data science in a specific field such as health, education or fraud prevention

WHY STUDY DATA SCIENCE AT LEEDS BECKETT UNIVERSITY...

1. Industry experience expert course team
2. Guest lectures from industry professionals
3. Research informed learning experience

- Data and information are recognised as central to the economic, business and cultural life of our society today. This course will equip you with the advanced information and analytic skills to thrive in the digital knowledge economy.
- You could already be working and looking to enhance your expertise in data science. Alternatively, you may have recently graduated and want to move into roles specifically aligned with data science and analytics. We'll help you develop a comprehensive understanding of the role of data within business.

Accredited By: BCS

- In the UK, a BCS (British Computer Society) accredited degree means your university computing or IT program has been formally evaluated by the chartered body for IT. .
- It guarantees that your education meets the rigorous standards required by the tech industry and fast-tracks your path to professional qualifications.
- BCS-accreditation is a mark of quality and trust.
- A degree recognised by employers in the UK and globally.
